PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack Software Engineer with 7+ years of experience designing, developing, deploying, and supporting enterprise-grade web applications, business systems, ERP/CRM solutions, and API-driven platforms. Strong expertise in PHP (Laravel, Yii2), Python (Django), JavaScript, TypeScript, React.js, Next.js, Vue.js, Node.js, Express.js, MySQL, PostgreSQL, MongoDB, and WordPress.

Proven experience building complex data-driven applications including insurance management systems, CRM platforms, marketplace solutions, e-commerce platforms, telecommunications systems, reporting platforms, and business process automation tools. Experienced in software architecture, database design, RESTful API development, authentication and authorization systems, role-based access control (RBAC), frontend engineering, CI/CD workflows, testing, deployment, and production support.

Strong background collaborating with stakeholders, translating business requirements and Figma designs into scalable solutions, and delivering high-quality software in Agile environments.

CORE COMPETENCIES

- Full-Stack Software Development
 - Enterprise Application Development
 - ERP & CRM Systems
 - Software Architecture & Design
 - Database Design & Optimization
 - RESTful API Development
 - Microservices Architecture
 - Authentication & Authorization
 - Role-Based Access Control (RBAC)
 - Responsive Web Development
 - UI/UX Implementation from Figma
 - Agile/Scrum Development
 - CI/CD & Deployment Automation
 - Performance Optimization
 - Technical Documentation
 - Production Support & Troubleshooting
 - Business Process Automation
 - System Integration
-

TECHNICAL SKILLS

Programming Languages

- PHP
- Python
- JavaScript (ES6+)
- TypeScript
- SQL

Backend Frameworks & Technologies

- Laravel
- Yii2
- Django
- Node.js
- Express.js

Frontend Technologies

- React.js
- Next.js
- Vue.js
- HTML5
- CSS3
- Tailwind CSS
- Responsive Web Design
- Mobile-First Development

- AJAX
- JSON

API Development

- RESTful APIs
- API Integration
- Authentication & Authorization
- JWT Authentication
- Role-Based Access Control (RBAC)
- Third-Party Integrations
- Payment Integrations (M-Pesa)

Databases

- MySQL
- PostgreSQL
- MongoDB
- Database Design
- Query Optimization
- Data Modeling
- Reporting & Analytics

CMS & Enterprise Platforms

- WordPress (2018 – Present)
- ERPNext Customization
- CRM Systems
- Content Management Systems

DevOps & Development Tools

- Git
- GitHub
- GitLab
- Docker
- Linux
- Nginx
- CI/CD Pipelines
- Postman
- Vercel

Testing & Quality Assurance

- Unit Testing
- Integration Testing
- Software Debugging
- Performance Optimization
- Code Reviews

AI-Assisted Development

- ChatGPT Codex
- Claude code
- GitHub Copilot
- Cursor
- Windsurf
- AI-Assisted Development Workflows

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer (Freelance)

June 2023 – Present

Design, develop, deploy, and maintain enterprise web applications and business systems for clients across multiple industries.

Key Responsibilities

- Gather and analyze business requirements.
- Design software architecture and database solutions.
- Develop scalable backend services using Laravel, Django, Node.js, and Express.js.
- Build responsive frontend applications using React.js, Next.js, Vue.js, HTML5, CSS3, and Tailwind CSS.
- Develop RESTful APIs and third-party integrations.
- Implement authentication, authorization, and RBAC systems.
- Translate UI/UX requirements and Figma designs into responsive interfaces.
- Deploy and maintain production systems.
- Troubleshoot issues and optimize application performance.
- Collaborate with clients and stakeholders throughout project lifecycles.

Selected Projects

Hamaline Insurance Management Platform

Lead Solution Architect & Software Developer

Designed and implemented a comprehensive insurance management platform supporting policy administration, member management, reporting, claims processing, customer servicing, and operational workflows.

Key Contributions

- Conducted stakeholder engagement and requirements gathering.
- Designed application architecture and database architecture.
- Developed policy management and claims processing modules.
- Built reporting and analytics functionality.
- Implemented authentication and RBAC features.
- Developed secure APIs and integrations.
- Led deployment, optimization, and production support.

Technologies: Laravel, PHP, MySQL, REST APIs, Git

BLVDGuide Marketplace Platform

Solution Architect & Full-Stack Developer

Architected and developed a marketplace platform supporting discovery and management of coworking spaces, conference venues, wedding venues, studios, and serviced offices.

Key Contributions

- Defined platform architecture and domain models.
- Developed search functionality and listing management workflows.
- Built responsive user interfaces.
- Implemented user management and RBAC systems.
- Designed scalable database architecture.
- Developed APIs supporting frontend applications.

Technologies: Laravel, React.js, Inertia.js, MySQL, Tailwind CSS

2B Gamers E-Commerce Platform

Full-Stack Software Developer

Designed and implemented a complete e-commerce solution supporting inventory management, shopping cart workflows, payment processing, and order management.

Key Contributions

- Designed commerce architecture and domain models.
- Integrated M-Pesa payment systems.
- Developed REST APIs and transaction workflows.
- Built customer, product, and order management systems.
- Optimized application performance and scalability.

Technologies: Laravel, PHP, MySQL, JavaScript

CRM Platform

Software Developer

Developed CRM functionality supporting customer management, workflow automation, reporting, and operational processes.

Key Contributions

- Developed backend business logic using Django.
- Designed relational database structures.
- Implemented authentication and RBAC controls.
- Developed APIs and reporting capabilities.
- Supported maintenance and feature enhancements.

Technologies: Python, Django, PostgreSQL, REST APIs

Simplifi Networks Platform

Software Developer

Developed enterprise platforms supporting telecommunications and networking product distribution operations.

Key Contributions

- Designed product catalog architecture.
- Developed backend services and integrations.
- Built content and information management capabilities.

- Supported deployment and infrastructure planning.

Technologies: Laravel, PHP, MySQL

Software Developer

AfriQ Network Solutions Ltd

May 2022 – May 2023

Responsibilities

- Developed backend APIs and business services.
 - Built frontend functionality for enterprise systems.
 - Maintained Laravel-based applications.
 - Optimized MySQL databases and reporting systems.
 - Troubleshoot and resolved production issues.
 - Participated in Agile development activities.
 - Collaborated with developers, testers, and business stakeholders.
 - Contributed to software enhancements and system improvements.
-

Software Developer

MwalimuPLUS & Ajira Connect

October 2018 – April 2022

Responsibilities

- Developed web applications using Yii2, Laravel and JavaScript.
 - Built authentication and authorization systems.
 - Developed reporting modules and dashboards.
 - Designed and optimized SQL queries.
 - Maintained production applications.
 - Participated in feature development and testing.
 - Collaborated in Agile development teams.
 - Supported ongoing software improvements.
-

PROJECT EXPERTISE

- Insurance Management Systems
 - ERP Systems
 - CRM Systems
 - E-Commerce Platforms
 - Marketplace Platforms
 - SaaS Applications
 - Enterprise Web Applications
 - Reporting & Analytics Systems
 - Payment Integration Systems
 - Telecommunications Platforms
 - API-Driven Applications
 - Business Process Automation Solutions
-

EDUCATION

Bachelor of Science in Computer Science

Multimedia University of Kenya

2013 – 2017

ADDITIONAL INFORMATION

- 7+ years of professional software development experience.
 - Extensive experience developing enterprise-grade systems and business applications.
 - Strong experience with Agile/Scrum development methodologies.
 - Proven experience designing complex database-driven applications.
 - Strong GitHub and version control workflow experience.
 - Experience translating business requirements into scalable software solutions.
 - Excellent analytical, problem-solving, and communication skills.
 - Comfortable working independently and within cross-functional teams.
